

New to FutureBasic

- [1] Install Apple's Xcode app via their Mac App Store(MAS).
Launch Xcode and follow any additional setup instructions.
- [2] Download the latest FutureBasic 5 version and move it to the standard /Applications directory.
- [3] Launch FutureBasic 5
- [4] Create a new file (cmd-N), key in some code and run it.

```
include "Tlbx CocoaUI.incl"  
cocoainit
```

```
cocoa window 1  
cocoa button 1
```

```
HandleEvents
```
